## GIT INSTALLTION

### 1. LINUX:

#### Debian / Ubuntu (apt-get)

Git packages are available via apt:

From your shell, install Git using apt-get:

**Step 1:** Open your terminal and update using the following command.

```
$ sudo apt-get update
```

**Step 2:** install git using apt module as shown below:

```
$ sudo apt-get install git
```

**Step 3** Check if it was installed successfully or not.

```
$ git --version
```

**Step 4:** Configure your git username and email using the following commands, replacing Emma's name with your own. These details will be associated with any commits that you create:

```
$ git config --global user.name "example"  
$ git config --global user.email "example@example.com"
```

**Congratulations!** You have successfully installed git on your Mac system.
